The NMED Site Assessment folks were doing a re-assessment of this site. George, do you want me to follow-up with the request below?

Thanks. LaDonna

Good Morning George,

LaDonna Turner is the SAM responsible for Site Assessment activities in the State of New Mexico. Unfortunately, she is out of the office (on Leave) this week. Brenda Cook is the Region 6 NPL Coordinator, and she is on Leave today. If this is a time-critical request which cannot wait until LaDonna returns to the office next week, I can look into the issue and try to find the information you need. Please let me know.

Thanks,

Bret Kendrick
Site Assessment Manager
Superfund Division

According to the CERCLIS stuff, it looks like somebody in Site Assessment pulled it out of the archive 2 or 3 years ago. That's after NFRAPing it 16 years ago (No Further Remedial Action Planned). They do that sometimes when cleanup standards or action levels change.

You should ask Brenda Cook or Bret Kendrick. One of them may know why it was pulled out of archive.

It sure doesn't look like we have any kind of plans or cleanup working.

Good afternoon and are two aware of this? If not, then I'll talk with Mike Ortiz of NMED for additional information. Thanks and take care!

Subject: Santa Fe, NM cleanup site

Message: As part of a graduate project, I am looking for information on a property in Santa Fe, NM that belongs to Eberline Instruments. The FRS lists its address as 504 Airport Road, Santa Fe, NM 87505-8750 (EPA Registry ID 110022738732, http://iaspub.epa.gov/enviro/fii_query_detail_disp_program_facility?p_registry_id=110022738732). I have been told by city officials that the site has a small amount of radioactive contamination, and they think the EPA is cleaning it up in phases but they are not sure where the project stands. Could someone at EPA please provide me with information regarding this facility?
